

How to Make Your Own Russian Doll

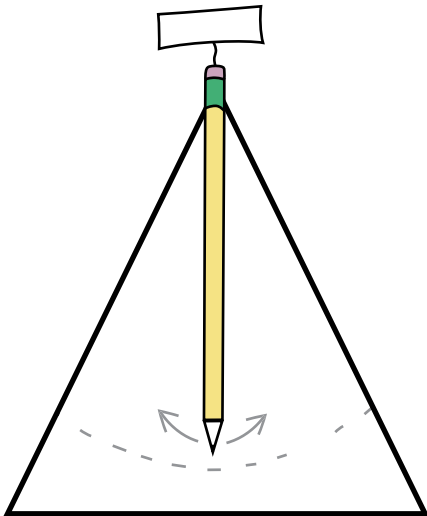

1.

Step One: Cut out paper template for each of the dolls. *The dimensions for the dolls are, 15in" x 15in", 7.5in" x 7.5in" & 3.25in" x 3.25in"*

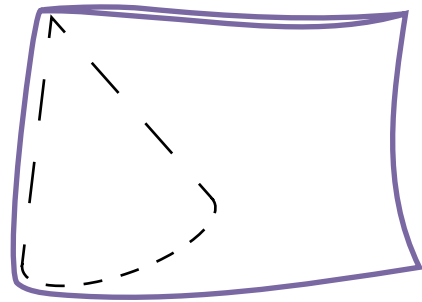

2.

Step Two: To make the bottom curved, which will allow us to construct the doll, tie a string to a pencil. Then, tape the string to a table and by swinging the pencil to the left and right an arc will be created. Then, cut the bottom of the template.

3.

Step Three: On a large sheet of folded felt - 22" in x 14" in - cut out the paper templates. You can pin the template to make cutting it out easier but make sure to ask a parent for help!

4.

Step Four: Now that all the felt patterns are cut out, make a cone shape out of the felt and use glue on the seam where the folded sides meet. Then cut out felt and glue or draw with marker on the face
